

NAJAH ENTERPRISES

 **ALCOM** - STRATEGIC INVESTOR

PREMIUM QUALITY, GLOBAL TRUST

About Us

Najah Enterprises founded by Mr. Rafique Nadaf is a trusted exporter, trading house, Najah Enterprises provides innovative and durable packaging solutions tailored to meet the demands of diverse industries. Our range includes PP and HDPE bags, FIBC bags, stretch film rolls, and LDPE bags, each designed to offer superior strength, flexibility, and protection.

Understanding the critical role packaging plays in maintaining product integrity during storage and transportation, we ensure that our materials are sourced from trusted manufacturers and comply with global safety and environmental standards. Our packaging solutions are customized to meet industry-specific requirements, making them an ideal choice for food, agriculture, and industrial applications.

PACKAGING MATERIAL SOLUTION

FIBC Bags

Durable and high-capacity bulk bags designed for efficient storage and transportation of heavy materials. The reinforced structure and flexible design make them ideal for industrial use.

Stretch Film Roll

Strong and stretchable film that provides secure wrapping and protection for goods during storage and transit. Ensures stability and dust resistance with its cling properties.

PP and HDPE Bags

Lightweight yet durable packaging bags made from high-quality polypropylene and HDPE. Ideal for agriculture, industrial, and commercial storage, offering moisture resistance and strength.

LPDE Bags

Flexible and tear-resistant plastic bags known for their smooth finish and high durability. Suitable for food, pharmaceutical, and industrial packaging, ensuring long-lasting protection.

FIBC BAGS

4 LOOP FIBC BAGS

Heavy-duty bulk bag with four lifting loops for easy handling and safe transportation of large volumes.

TUNNEL LOOP BAGS

Bulk bag with side loops (tunnels) that allow forklift entry without needing extra equipment.

VENTILATED BAG

Breathable bag designed for items like firewood or agricultural products that require air circulation.

CONICAL BAG

Features a cone-shaped bottom for easy discharge of fine or sticky materials.

FIBC BAGS

BAFFLED BAG

Maintains a square shape when filled, allowing for better stacking and space utilization.

U PANEL BAG

Constructed with U-shaped panels for strong side support and efficient filling.

TUBULAR BAG

Seamless cylindrical body ideal for fine materials, reducing risk of leakage.

TYPE C CONDUCTIVE BAG

Made from conductive materials to safely handle flammable or explosive powders in hazardous environments.

STRETCH FILM ROLL

High-quality stretch film rolls designed for secure pallet wrapping and load stability. Offers excellent elasticity, tear resistance, and protection against dust, moisture, and damage during storage or transit. Ideal for industrial and commercial use.

Size: 2 inch to 24 inch

Thickness: 9 microns to 51

micron Grade: Manual Grade

& Machine Grade

PP AND HDPE BAGS

Durable, lightweight, and moisture-resistant bags made from polypropylene and high-density polyethylene—ideal for packaging grains, fertilizers, chemicals, and other industrial goods. Designed to ensure safe storage and easy transportation.

PRODUCT SPECIFICATION

For 5 kgs bags	Capacity : fit to contain 5kg of product	Typical size 30 x 50 cm +/- 5cm and Typical weight 24grs/piece.
For 10 kgs bags	Capacity : fit to contain 10kg of product	Typical size 40 x 50 cm +/- 5cm and Typical weight 32grs/piece.
for 20 , 25 kgs bags	Capacity : fit to contain 25kg of product	Typical size 50 x 75 cm +/- 5cm and Typical weight 65grs/piece.
For 40 kgs bags	Capacity : fit to contain 40kg of product	Typical size 55 x 90 cm +/- 5cm and Typical weight 85grs/piece.
For 50, 60, 70 kgs bags	Capacity : fit to contain 50kg of product	Typical size 60 x 100 cm +/- 5cm and Typical weight 105grs/piece.
For 90 kgs bags	Capacity : fit to contain 90g of product	Typical size 75 x 116 cm +/- 5cm and Typical weight 153grs/piece.

LDPE BAGS

Flexible and durable packaging bags made from low-density polyethylene, ideal for storing and protecting a wide range of goods including food, textiles, and industrial products.

Carry CAPACITY :5kg, 10kg , 25kg , 40kg , 50kg SIZE : 2 MM TO 800MM WIDTH Gauge : 200 gauge to 700 gauge

Flexible and durable packaging bags made from low-density polyethylene, ideal for storing and protecting a wide range of goods including food, textiles, and industrial products.

Thickness: 20 to 150 Microns (80 to 600 gauge) Width: UP to 1450 mm (57 Inches). High Slip:< 0.20
